

Process for Entering Grant/Project Statement information in TRACS, Post-Award within the 60-day Requirement

(Note: This process may be preferred for entities applying for competitive grant awards).

Pros: Doesn't require data entry in TRACS prior to submitting a formal application.

Cons: Risk project statement not following the TRACS standard objectives format. In such cases, data entry in TRACS may be difficult without changes to the project statement that may require an amendment to the formal award.

¹ The WSFR program has adopted the use of Standard Objectives that **must** be used for all grants in TRACS. If your application uses alternative objectives, you will be unable to enter those objectives in TRACS.

² Grant & project statement data should be entered no later than 60-days after the Notice of Award has been received by the recipient.

³ Formal grant approval occurs in GrantSolutions, not TRACS. Approval here is simply WSFR's concurrence that the project statement entered in TRACS matches the official approved project statement in GrantSolutions. Project statements approved under grants in GrantSolutions should be identical to the project statements approved by both the non-Federal and Federal approvals in TRACS.

⁴ TRACS does not obligate funding to approved grants. Federal funds are obligated to awards during the approval process in GrantSolutions.
